The Newport Beach Police Department is offering an Internet Safety presentation for parents. This presentation is designed to give you the tools to help your child safely navigate new technologies and the Internet. If your child uses a computer, cell phone, or gaming device with Internet access, here are a few questions you should be asking yourself:

- Do I monitor my child’s online activities?
  Email, chat, web surfing are all easily viewable to parents!
- Should I set time restrictions for my child’s Internet use?
  You can enforce this electronically.
- Does my child participate in online gaming or chat and do they communicate with strangers?
- Do I know my child’s online friends, and everybody in their speed dial?
- Does my child have a Facebook, MySpace or Club Penguin profile?
- Do I know what a proxy server is?
  Your child does.

Technology and the Internet change rapidly! To help you answer these questions and more, please join Andi Querry from the Newport Beach Police Department and Scott Burnett from Integrity Computer Concepts for this informative presentation followed by a question and answer session.

This presentation is designed for parents and guardians, please no children.
